

Ireland is still threatened with Fracking – extraction of methane gas from rock using huge volumes of water and toxic chemicals. The fracking industry operates with huge risks to our public health and contamination of our land, water and air. Applications for licences to frack are still on the Minister’s desk.

### General Election Candidates!

It is now time to pass laws that will ban fracking forever in Ireland. Only the Oireachtas members can do this. All candidates for election to Dáil Éireann are asked to SIGN THE PLEDGE to support legislation to ban fracking in Ireland.

As a candidate for election to Dáil Éireann, I pledge that, if elected, I will actively support legislation to ban unconventional exploration or extraction of oil or gas using high volume hydraulic fracturing (fracking) in Ireland.

I make this pledge in support of the health and safety of the people of Ireland and the protection of our international reputation for clean air, water and land.
